# A TYPICAL DAY OF EXPLORING

Our Itineraries are designed to help you experience as much of the Galápagos as possible. Cruising is the ultimate way to explore the islands, giving you access to both inhabited and uninhabited visitor sites that cannot be reached by day boats.

Your day begins with breakfast around 7:00 am, followed by a dinghy ride to your first guided land excursion. After exploring with your naturalist guide, you'll return to the yacht to prepare for your first snorkel. Lunch is served on board as the yacht cruises to the next destination. In the afternoon, you'll enjoy a second land visit and another opportunity to snorkel, with kayaking available at select sites. The day ends back on board with dinner and an evening briefing from your guide. All excursions and water activities are optional, allowing guests to explore at their own pace.
